WHY CHOOSE METABO HPT FOR CORDLESS DRILLING & FASTENING?

KEY TRIPLE HAMMER® BENEFITS

• Faster impact & tightening speed
• More fastening torque with less slippage from the screw head
• Greater comfort with less vibrations

The hammer has three strikers (instead of the conventional dual striker) and therefore provides:

KEY IP56 BENEFITS

• Metabo-HPT is one of the very few tool manufacturers designing tools with IP56 rating to withstand harsh jobsite conditions
• Meets IP56 Protection Standard from IEC – which prevents damage to the tool exposed to dust and unexpected rain

REACTIVE FORCE CONTROL® BENEFITS

Reactive Force Control (RFC) stops the motor when the tool bit gets caught therefore preventing harmful twisting of the tool.
